LAGUNA 3.0

THE NEW AGE OF THE WATER-BASED WALL PAINT

As far as the interior water-based paints are concerned, Colorificio San Marco has always kept pace with the times and has been able to innovate in order to promptly meet the needs of its target audience, the professional user.

This pioneering vocation, to anticipate the natural evolution of the market, has resulted in the birth of **Laguna 3.0**.

Washable water-based wall paint **Class 3**, **Laguna 3.0** is able to transfer to the substrate a **matt** and **uniform appearance**, even on surfaces with different levels of absorption. Extremely easy to apply, it provides high coverage and excellent whiteness. It presents more prominent features that make it unique and innovative, such as being **odorless** and with **low VOC content**.

The history of this product is closely linked to a futuristic choice taken in the mid-nineties: in 1999 Colorificio San Marco introduces, in fact, Laguna, breathable water-based paint based on acrylic resin.

The decision to use this type of binder in a market that, up to that time, primarily proposed products made using vinyl-type binder, has proved successful.

Laguna 3.0, as well as Laguna, is therefore a product that looks to the future and that it is directed, once again, to meet the needs of professional users looking for a washable paint for interiors with high quality.

LAGUNA 3.0 THE EVOLUTION*:

- Odorless
- APEO-free, low V.O.C.
- Higher wet-scrub resistance (class 3 UNI EN 13300)
- Higher whiteness
- More matt appearance

* Details in comparison with Laguna

✓ Environmental Data Sheet

Class A (very low emissions)
for what concerns the emission of volatile
substances in the indoor Air.

LAGUNA 3.0

TECHNICAL DETAILS:

- Tools: brush, roller, spray gun and airless
- Application: 2 coats
- Spreading rate: 8-10 sqm/l per coat
- Drying time (at 25°C and 65% di R.H.):
to touch 1 hours, to recoat after 3 hours
- Wet-scrub resistance per UNI 10560: > 2000 cycles, resistant

CLASSIFICATION UNI EN 13300:

- Wet-scrub resistance per ISO 11998: class 3
- Gloss per EN ISO 2813: <5, very matt
- Coverage per ISO 6504-3: class 1 with a spreading rate of 7 mq/l

CERTIFICATIONS:

- VOC-FORMALDEHIDE determination
