

EASY_ART

INDOOR DECORATIVE FINISH WITH METALLIC EFFECT

series 381

Colorificio San Marco SpA gives priority to environmental protection and safety in the workplace. For this reason Colorificio San Marco constantly seeks to improve the quality of its products and their production cycles in order to reduce the overall impact on the environment and ensure quality and safety for customers.

This environmental data sheet shows the environmental information of EASY_ART: LCA, LEED and other information.

EASY_ART creates beautiful attractive surfaces, ideal for both modern and classic settings and for exclusive and highly refined environments.

Extremely easy to apply acrylic finish that always ensures excellent decorative results, pleasant to the touch. Perfect for personalising a variety of different surfaces (e.g. brick, wood, plastic) to create attractive atmospheres full of energy.

LIFE CYCLE ASSESSMENT

Life Cycle Assessment (LCA) is a tool to quantify the environmental impact of a product or service throughout its entire life cycle. The LCA methodology, as defined by ISO 14040/44 [1-2], consists of four phases:

- goal and scope definition
- inventory analysis
- impact assessment
- interpretation

Goal and scope

The **goal** of this LCA [3] is to provide transparency about the environmental performance of EASY_ART, to create improvement options and support environmental communication. The functional unit is 1 kg of paint including packaging, with a spreading rate of 4-6 sqm/l (± 0.242 kg/sqm). The **system boundaries** include raw materials, their transportation, processing, packaging, distribution, use and packaging disposal. During the use phase the paint is hand-applied and the associated emissions are insignificant.

Inventory analysis

Primary data are used to the most significant processes, like the paint recipe, packaging and factory consumptions and emissions. Data refer to 2012 and are collected at the Colorificio San Marco's factory located in Marcon (VE). Secondary data originate from the ecoinvent v3 database [4]. The LCA calculations are performed with the LCA software SimaPro 8.0.3 [5].

Impact assessment

Life cycle impact assessment has been done with the method **PCR product group: UN CPC 3511 2014:5 on paint [6]**, as indicated in the EPD programme of the International EPD Consortium This method consists of different environmental indicators including the Carbon Footprint, human toxicity, ecotoxicity, air emissions, water consumption and waste. Table 1 shows the LCA results.

Life cycle assessment verification

The LCA calculation system of Colorificio San Marco is verified by a third party in conformity with UNI EN ISO 11044:2006 and UNI EN ISO 11040:2006 [7]

Table 1: LCA results.

		Unit	Total	Upstream	Core	Downstream
Impact categories	Global Warming (100 yr)	kg CO ₂ eq	1,971	1,538	0,173	0,259
	Ozone layer depletion (ODPr)	mg CFC-11 eq	0,155	0,129	0,014	0,012
	Photochemical oxidation	g C ₂ H ₄ eq	0,902	0,843	0,049	0,009
	Acidification	g SO ₂ eq	16,92	14,89	1,4	0,61
	Eutrophication	g PO ₄ ⁻⁻⁻ eq	2,984	2,55	0,223	0,21
	Human toxicity, non-cancer	CTUh * 10 ⁻⁹	0,371	0,351	0,01	0,009
	Human toxicity, cancer	CTUh * 10 ⁻⁹	0,152	0,154	0,004	-0,007
	Ecotoxicity	CTUe * 10 ⁻³	24,33	30,89	1,348	-7,912
Waste						
Waste	Hazardous waste	kg	0,008	0,007	0,000	0,001
	Non hazardous waste	kg	0,364	0,297	0,029	0,037
Air Emissions						
Air Emissions	VOC	g	0,374	0,353	0,014	0,006
	NMVOG	g	1,746	1,393	0,172	0,179
	SO ₂	g	11,574	10,69	0,737	0,146
	CO ₂ (fossil)	kg	1,808	1,394	0,162	0,251
	Methane (fossil)	g	5,365	4,829	0,319	0,217
	methane (biogenic)	g	0,109	0,107	0,003	-0,001
	NO _x	g	5,665	3,779	1,012	0,874
Other						
Other	Material subjected to recycling	g	30,21	0,48	6,56	23,17
	Blue virtual water	kg	25,94	24,51	1,05	0,37

Interpretation

The LCA results indicate that the largest contributions come from upstream processes (i.e. raw materials). The Carbon Footprint of EASY_ART is 1.971 kg CO₂ eq.

The negative values are caused by the pallet reuse.

LEED

LEED means Leadership in Energy and Environmental Design. It is a voluntary program that provides third-party verification of green buildings. It provides building owners and operators a tool to understand their building's environmental performance and to create healthy indoor spaces.

EASY_ART

INDOOR DECORATIVE FINISH WITH METALLIC EFFECT

series 381

In order to obtain LEED certification, projects must satisfy prerequisites and earn points (there is a threshold). The number of points the project earns determines its level of LEED certification.

LEED is a certification system that deals with the environmental performance of buildings based on overall characteristics of the project. Although LEED does not certify products and services of individual companies, products and services do play a role and can help projects with credit achievement.

The table below shows EASY_ART potential contribution to the different **LEED credits** of the LEED 2009 and LEED v4 (Leadership in Energy and Environmental Design) [8]. Table 2 shows the possible contribution of the paint to potential credits, if used properly.

Table 2: Potential LEED credits.

LEED 2009 Credits		Description	Possible points
MR credit 5	Regional Materials		1-2 points
IEQ credit 3.2	Construction Indoor air quality management plan		1 point
IEQ credit 4.2	Low-Emitting Materials Paints and Coatings		1 point
LEED V4 Credits		Description	Possible points
MR credit	Building Life-Cycle Impact Reduction		1-5 points
IEQ credit	Interior Lighting		1-2 points

More information are available on request

Colorificio San Marco does not guarantee that credits will be obtained by projects pursuing LEED certification. The designer or engineer will need to evaluate and verify if the project complies with the LEED requirements.

OTHER INFORMATION

Label VOC Dir. EU 2004/42/EU [9]

Limit value EU (Dir. 2004/42/EC)

Cat. L: Decorative effect coatings (water-base): 200 g/l (2010)

EASY_ART Contains max: 200 g/l VOC

VOC Dir. 2004/42/EC : Content [9]

The actual content of VOC substances is less than 20 g/l
