High breathability, excellent coverage and whiteness, easy to apply, suitable for bathrooms and kitchens, matt appearance.

BREATHABLE WATER REPELLENT ACRYLIC WATER-BASED  
PAINT FOR INDOOR AND OUTDOOR USE

Due to its many qualities and properties Laguna is the best choice for different type of tinting.

Ideal for professional use, good solution of painting on all indoor surfaces, including those subject to moisture such as **kitchens and bathrooms**.

The perfectly balanced formulation enables its use on indoor surfaces with moderate exposure to atmospheric agents. It features for the user high coverage, ease of application, good expansion and transfers to the support a matt and homogeneous appearance also in presence of different absorptions.

- Tools: brush, roller, spray and airless gun.
- Number of coats: 2
- Dilution: first coat at 40-45% with water; second coat at 30%.
- Indicative spreading rate: 8-10 sqm/l per coat
- Drying: (at 25°C and 65% R.H.) to touch in 1 hours; recoatable after 4 hours.

Available at 15 - 4 - 0,750 l sizes.
